

# CHARLES C. COSSETTE

## PhD Candidate | Robotics and Autonomous Systems

+1 (514) 668 2195 @ charles.c.cossette@gmail.com  
1725 Rue Allard, Brossard, QC, Canada charlescossette.github.io

Researcher at McGill University supervised by Prof. James R. Forbes and Prof. David Saussie. I specialize in estimation, planning, and control algorithms for multi-robot teams, specifically how to best use ultra-wideband radio to enable collaboration between robots.

## EDUCATION

|         |  |
|---------|--|
| present | <b>Doctor of Philosophy</b> , McGill University, Mechanical Engineering    |
| 2019    | <b>Master of Engineering</b> , McGill University, Mechanical Engineering   |
| 2017    | <b>Bachelor of Engineering</b> , McGill University, Mechanical Engineering |

## SKILLS

|                |                              |              |                    |                    |                  |       |
|----------------|------------------------------|--------------|--------------------|--------------------|------------------|-------|
| Coding         | Python                       | Embedded C   | Matlab             | C++                |                  |       |
| Other software | Robot Operating System (ROS) | FreeRTOS     | Pytorch            | OpenCV             | git              | Linux |
| Math           | State Estimation             | SLAM         | Bayesian Inference | Probability Theory | Machine Learning |       |
|                | Control Theory               | Graph Theory | Optimization       |                    |                  |       |

## WORK

|                |   |
|----------------|---|
| December 2018  | <b>Guidance, Navigation, and Control Consultant, REACTION DYNAMICS, Montreal, Canada.</b>   |
| July 2019      | Built 3D flight dynamics simulator and designed control algorithms for an orbital launch vehicle.<br>Python Matlab Dynamic simulation PID Control LQR Control |
| July 2018      | <b>Senior Technical Specialist, CAE, Montreal, Canada.</b>  |
| November 2018  | Developed and fixed customer issues for airplane engine simulation software.<br>C/C++   |
| September 2017 | <b>Research Intern, ARA ROBOTICS, Montreal, Canada.</b>   |
| May 2018       | As part of Master's degree, developed an adaptive notch filter for vibration filtering for quadcopters.<br>Embedded C Matlab Kalman Filtering FFT             |

## FEATURED PUBLICATIONS

|  |               |
|--|---------------|
| <b>OPTIMAL MULTI-ROBOT FORMATIONS FOR RELATIVE POSE ESTIMATION USING RANGE MEASUREMENTS</b><br>C. C. COSSETTE, M. A. SHALABY, D. SAUSSIE, J. L. NY et J. R. FORBES <a href="#">Paper</a>                             | IROS 2022     |
| <b>LOCALIZATION WITH DIRECTIONAL COORDINATES</b><br>C. C. COSSETTE, M. SHALABY, D. SAUSSIE et J. R. FORBES <a href="#">Paper</a> <a href="#">Video</a>   | IROS 2021     |
| <b>RELATIVE POSITION ESTIMATION BETWEEN TWO UWB DEVICES WITH IMUS</b><br>C. C. COSSETTE, M. SHALABY, D. SAUSSIE, J. R. FORBES et J. L. NY <b>(Best Paper Nomination)</b> <a href="#">Paper</a> <a href="#">Video</a> | RAL/ICRA 2021 |
| <b>CASCADED FILTERING USING THE SIGMA POINT TRANSFORMATION</b><br>M. SHALABY, C. C. COSSETTE, J. LE NY et J. R. FORBES <b>(Best Paper Finalist)</b> <a href="#">Paper</a> <a href="#">Video</a>                      | RAL/ICRA 2021 |
| <b>THE COMPLEX-STEP DERIVATIVE APPROXIMATION ON MATRIX LIE GROUPS</b><br>C. C. COSSETTE, A. WALSH et J. R. FORBES <a href="#">Paper</a>  | RAL/ICRA 2020 |

## SUCCESSFUL GRANT PROPOSALS

|      |  |
|------|--|
| 2022 | <b>NSERC Alliance Grant (\$440K).</b> “Infrastructure inspection using a team of unmanned aerial vehicles.” Co-authored with James Forbes, Mohammed Shalaby, Jérôme Le Ny, David Saussié, Gunes Kurt.  |
| 2020 | <b>FRQNT Personal Doctoral Scholarship (\$63K).</b> “Formation control of robotic systems using ultra-wideband radio for self-localization.”   |
| 2019 | <b>NSERC Engage Award (\$25K).</b> “Control, Navigation and Guidance Concept Studies for a Venture Class Orbital Launch Vehicle.” Co-authored with James Forbes, Bachar Elzein.  |
| 2019 | <b>Mitacs Accelerate Scholarship (\$15K).</b> “Research and Experimental Testing of Liquid-Injection Thrust Vector Control Actuator.” Co-authored with James Forbes, Julien Otis-Laperrière.   |
| 2019 | <b>Canadian Space Agency Space Technology and Development Program (\$539K).</b> “Development of Guidance, Navigation, and Control Technologies for a Hybrid Engine Small Satellite Launch Vehicle.” Co-authored with Sandro Papais, Bachar Elzein. |

## AWARDS

|      |  |
|------|--|
| 2020 | <b>Best Presentation Award</b> at GERAD Student Research Day   |
| 2018 | <b>Spaceport America Cup Champions</b> - 1st out of 124 universities at rocket engineering competition |
| 2018 | <b>1st place in 10000ft COTS motor category</b> - Spaceport America Cup rocket engineering competition |
| 2017 | <b>1st place at McGill Engineering Research Showcase</b>   |
| 2016 | <b>Teaching Assistant of the Year</b> - McGill Association of Mechanical Engineers                     |
| 2016 | <b>Outstanding Contribution to Design Teams</b> - McGill Engineering Undergraduate Society             |

## TEACHING EXPERIENCE

|           |  |
|-----------|--|
| 2018      | <b>Teaching Assistant - MECH 383 - Applied Electronics and Instrumentation</b> , McGill University |
| 2015-2018 | <b>Crash Course Instructor - Visual Basic for Applications (Excel)</b> , McGill University         |
| 2015-2016 | <b>Teaching Assistant - MATH264 - Advanced Calculus for Engineers</b> , McGill University          |

## PROJECTS

**TECHNICAL DIRECTOR - SPACEPORT AMERICA CUP CHAMPIONS - MCGILL ROCKET TEAM**  
 [Competition Video](#)  [Manufacturing Video](#)  [www.mcgillrocketteam.com](http://www.mcgillrocketteam.com)

1st place of 124 international universities, 1st place in 10000ft off-the-shelf motor category at rocket engineering competition. Designed and built 11-foot-tall supersonic rocket with carbon-fiber airframe, automated parachute recovery, avionics, telemetry, and scientific payload. Led the 100+ student team as Technical Director.

2015 - 2018
